

LOW CODE

EXPERIMENT-2

NAME: DHARANIDHARAN P

ROLL NO: 240701118

Aim: To create a sample application in Zoho Creator, create a form, report, and dashboard, and explore the Develop, Deploy, and Manage sections of the Zoho Creator platform.

Setting up Zoho Creator:

I. Create the Sample Application

Procedure:

1. Logged in to Zoho Creator.
2. Clicked Create New Application.
3. Selected From scratch.
4. Entered the application name as "Inventory Management Form".
5. Clicked Create Application.

Create Form

II. Creating Form

Procedure:

1. Clicked Create → Form.
2. Entered the form name as "Inventory Details".
3. Added the required fields such as Item Name, Item Serial Number, Item Description, Item Storing Date, and Item state.
4. Saved the form.

The screenshot displays the Zoho Creator form builder interface for a form named 'Department'. The interface is divided into three main sections: a 'Basic Fields' sidebar on the left, a central form canvas, and a 'Field Properties' panel on the right.

Basic Fields: This sidebar contains various field types categorized into 'Basic Fields' and 'Advanced Fields'. The 'Basic Fields' category includes Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, and Multi Select.

Form Canvas: The central area shows the form structure. It includes a 'Department ID' field (highlighted with a dashed border), followed by 'Department Name', 'Department Head', and 'Department Location' fields. A '20' icon is visible below the 'Department Location' field.

Field Properties: The right panel shows the configuration for the selected 'Department ID' field. It includes fields for 'Field name' (Department ID), 'Field link name' (Department_ID), and 'View Field References'. The 'Validation' section shows 'Start index' set to 1. The 'Appearance' section shows 'Field type' set to 'Auto Number'.

The bottom of the interface features a Windows taskbar with the Start button, search bar, and various application icons. A notification bar at the bottom right indicates 'Trial expires in 15 days' and 'Upgrade' options.

Explanation: A form is used to collect information from users. It contains various input fields where users can enter data. The submitted data is stored in the application's database.

III. Viewing the Live Form

Procedure:

1. Opened the live "Inventory Details" form to input data.
2. Entered sample records (e.g., Laptop, Lenovo Yoga...)
3. Saved the entered data.

Department ID	Department Name	Department Head	Department Location
2	CSE	Ajay	A Block
1	CIVIL	Raja	I Block

Showing 2 of 2

Explanation: A report displays all the records entered through the form. It helps users search, sort, filter, and manage the stored data efficiently.

Exploring the Platform Architecture and Interface:

1. **Develop:**

The Develop section is used to build applications. It allows users to create forms, reports, pages, and workflows. It also supports application customization using Deluge scripting.

2. **Deploy:**

The Deploy section is used to publish applications. It allows sharing applications with users securely. User roles and permissions can also be configured here.

3. **Manage:**

The Manage section is used to administer the application. It helps manage users, backups, and integrations. It also monitors application performance and security.

Result:

Thus, a Zoho Creator account was created successfully. A sample application with a form, report, and dashboard was developed, and the Develop, Deploy, and Manage sections of the Zoho Creator platform were explored successfully.
